

# CBD for Dogs: Your Comprehensive Guide

[Home](#) / [CBD for Dogs: Your Comprehensive...](#)

Welcome to your trusted source for understanding how CBD can benefit your canine companions. At Mikko's Choice, we're dedicated to enhancing pet wellness through high-quality CBD products. This guide will explore the effectiveness and safety of CBD for dogs, ensuring you're well-informed to make the best choices for your pet's health.

## Benefits of CBD for Dogs:

- Anxiety Reduction:** CBD has been studied for its anxiolytic effects in dogs, helping to reduce anxiety behaviors associated with stress, panic disorders, and fear. Research highlights CBD's ability to decrease autonomic arousal and fear expression, making it beneficial for dogs experiencing separation anxiety or noise phobias  
[Frontiers](#)
- Pain Management:** Significant research supports CBD's efficacy in managing pain, particularly due to arthritis. Studies indicate that CBD may reduce inflammation to potentially help manage chronic pain, offering a potential alternative to traditional medications that may have undesirable side effects  
[AVMA](#).
- Neuroprotective Properties:** CBD may offer neuroprotective effects due to its interaction with the endocannabinoid system, which is involved in maintaining neuronal health. This could be particularly beneficial for aging dogs or those with neurologic disorders  
[Frontiers](#).
- Long-term Safety:** Recent studies have explored the safety of long-term CBD use in dogs, showing no significant adverse effects over extended periods. This reassures pet owners considering CBD for long-term management of chronic conditions  
[Cannanine](#)
- Dosage Considerations:** Proper dosing of CBD is important to safety and effectiveness. Unlike medications where dosage might strictly depend on weight, CBD dosing for dogs often considers factors like the individual dog's condition, the severity of symptoms, and the specific CBD product being used. *These findings are supported by various studies and reviews, underscoring the therapeutic potential of CBD in veterinary use. However, it's important for pet owners to consult with veterinarians to tailor CBD use to their pets' specific health needs, ensuring the most effective and safe outcomes.*

## Case Studies/Testimonials:

Real-world examples and customer testimonials highlight the benefits of Mikko's Choice products.

"My dog, Bodhi (65lbs) was being weirdly hyper this evening. He had gone for a hike and spent the rest of the day outside putzing around with me and playing with my other dog — so, I think it was just the normal (sometimes random) zoomies of a youngster. He was driving us all a little crazy so I decided to try one of your treats – he was asleep on the couch in 5 mins" –Lizzie

"Our twelve year old rescue dog seems a lot happier on Mikko's Choice. He's a terrier mix prone to being very reactive but now he's calmer on his walks and with other dogs. Easy to give. Highly recommend." –Janice

"This tincture completely changed my pets life. I was a bit hesitant at first as I've tried other pet cbd products and haven't noticed much of a difference, but this 5000mg tincture is a total game changer. My senior dog stopped going for walks and didn't want to eat—two weeks into starting this tincture he's wanting to go for long walks again and eating breakfast and dinner no problem! Mikko's Choice has great dosage information and is super transparent about their testing results. I also love that it's a limited ingredient formula that has no flavoring or scent so my dogs totally happy to have it on treats or straight in their food. So happy I found this company!! I'll be a customer for life." –Max

"I am so thankful I found this CBD! It has given new life to my 12 year old arthritic dog. We have tried a couple of different brands and this is the one that has changed everything. It is of such good quality and I love that the .5 ml dose is all he needs, even being a big dog. He is no longer limping on our walks and has resumed the occasional backyard zoomies" –Nicole

"My 10 year old Rottweilers laid around most of the day, with the exception of eating, and going out to go to the bathroom. Within one week of taking Mikko's choice, they are playing like puppies with our four-year-old pitbull. It's awesome to see them chest, bumping each other and playing like they have no aches and pain. Thank you so much." -Karen

"You may have saved my sanity. Went to pet emergency yesterday and they thought my pup was in congestive heart failure (she wasn't) and she's been whining since 3pm yesterday when we got home. She's a zombie, not eating, wobbly when she walks, won't sleep and seems really nervous. All the vets think she's having a hard time clearing the med they gave her for pain/anxiety. Neither one of us has slept and I've been so worried about her. I gave her .25mg of your CBD at 10:30am and she fell asleep in less than an hour and she is the most peaceful she's been in 36 hours! Im hopeful that if she sleeps a few hours she will be back to normal. Thank you SO much. No other CBD has ever worked for her." -jen

"Mikko's Choice really helped my nervous dog get through a very loud East LA July 4th. Instead of shaking under the bed (as she's done in the past) she was able to calmly be in the living room with me and my family. Seeing her in such a calm state was such a gift. Thank you!" -Sarah

"My dog had a hot spot that kept getting bigger and bigger despite using different medicated sprays and medicated body wash. He is also very picky and will smell any medication we try to hide in treats and food. I gave Mikko's Choice a try and I was so amazed with the results. I was able to put it in a treat and my dog ate it up with no fight. After a few days I was able to remove his inflatable ring from around his neck and his hot spot started healing. He was alot calmer and I noticed amazing results. This has helped my dog in so many ways...when fireworks go off he is way more relaxed. He used to pace and cry alot during new years eve and July 4th. I stand by this product and will continue to buy this for my dogs. I have 3 medium sized dogs and 2 little ones (for size if you aren't sure) I gave them all Mikko's choice. Best product ever!" \_Iris

## Frequently Asked Questions (FAQs)

### – What are the benefits of CBD treats and tinctures for dogs?

CBD treats are excellent for situational use or as a budget-friendly option for daily wellness. They're easy to administer, especially when you're on the go. Tinctures, on the other hand, are ideal for precise dosing and can be used for higher daily doses or specific situational needs due to their concentrated form.

### – Are CBD treats and tinctures safe for dogs?

Yes, both treats and tinctures from Mikko's Choice are safe when used as directed. Our products are specifically formulated for pets, made with natural ingredients, and are third-party tested to ensure purity and potency.

### – How do I choose the right CBD product for my dog—treat or tincture?

Consider your pet's needs and your lifestyle. If you require precise dosing for chronic issues or want a potent solution, tinctures may be best. For ease of use and convenience, especially when traveling or in need of a quick dose, treats are ideal.

### – How long does it take for CBD treats and tinctures to work?

The onset of effects can vary; treats may take 30 to 60 minutes, while tinctures might act a bit quicker when administered directly into the mouth. The overall timing can depend on your dog's metabolism.

### – Are CBD treats and tinctures good for both daily and situational use?

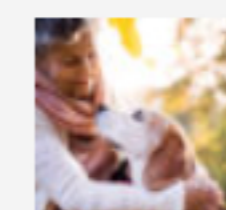

Absolutely. Treats are great for daily wellness or specific situations like anxiety during thunderstorms or vet visits. Tinctures offer versatility for daily wellness in a controlled dosage or high-strength needs and can also be used situationally for quick absorption.
